DETAILED ACTION

Applicant's election with traverse of Group II, claims 3,4 13(in-part)-15 and 17-18 in Paper filed 1/2/04 is acknowledged. The traversal is on the ground(s) that the rejoinder of Group VI with Group II is requested. This is not found persuasive because the product claims are currently not deemed allowable. When the product claims are allowed and the group for rejoinder encompasses all the limitation of the product, then rejoinder will be considered..

The requirement is still deemed proper and is therefore made FINAL.

The elected claims are further restricted upon further consideration.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Inventions I-XXXVI and *** are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different

modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions each group is directed to a patentably distinct amino acid sequence. Even though each sequence is made of amino acids, the sequence of amino acids and the types of amino acids are different. .

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other 35 groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
